DONGYEON KIM

+1 315-403-2981 | Kevinkdy1004@gmail.com / dkim147@syr.edu
Department of Economics, University of Seoul

EDUCATION

University of Seoul — Seoul, Korea
B.A. in Economics & B.S. in Mathematics (expected) — Mar 2021 – Jun 2027
GPA: 3.98/4.50

Syracuse University — Syracuse, NY
Exchange Student — Jan 2026 – Dec 2026
Spring 2026 GPA: 3.933

RESEARCH INTERESTS

Development Economics, Labor Economics, Public Economics, Population Economics, Education Economics

RESEARCH ASSISTANT EXPERIENCE

Research Assistant — June 2026 – Present
Prof. Shafaat Yar Khan, Syracuse University
Tools: Stata, GitHub

- Develop reusable code to estimate trade elasticities.

Research Assistant — May 2026 – Present
Prof. Kristy Buzard and Prof. Shafaat Yar Khan, Syracuse University
Tools: Stata, GitHub

- Improve data-processing routines by standardizing variable types across tariff schedules, correcting malformed product suffixes and tariff entries, and validating merge keys and product-year uniqueness.
- Organize scripts into separate processing stages for data consolidation, suffix correction, tariff cleaning, diagnostics, and merging to clarify the research workflow and facilitate maintenance.
- Harmonize historical tariff data across TSUSA and SIC 1972 classifications using product-to-industry concordances to support industry-level comparisons.
- Conduct event-study regressions to examine the relationship between tariff changes and import outcomes, exploring alternative fixed-effects specifications and visualizing estimated coefficients.
- Analyze tariff reductions across the Kennedy and Dillon Rounds, constructing industry-level comparisons and scatter plots to examine variation in trade liberalization.

Research Assistant — Jul 2025 – Dec 2025
Prof. Hyerim Son, University of Seoul

- Reviewed and synthesized empirical literature on gender and competition and the effects of performance-based assessment on student learning outcomes, and compiled studies on environmental pollutants.

INDEPENDENT & TEAM PROJECTS

Low Fertility, TFP, and Economic Growth: A Panel Analysis — Jan 2026 – May 2026
Independent Research, Statistics Seminar, Syracuse University
Faculty Advisor: Prof. Jianxuan Liu
Tool: R

- Constructed a panel dataset of 41 low-fertility countries (1970–2023) to examine how prolonged low fertility affects the contribution of total factor productivity (TFP) to economic growth.
- Estimated fixed-effects panel regressions with Driscoll–Kraay standard errors, incorporating interaction terms between TFP and low-fertility duration.
- Implemented Monte Carlo simulations using a total fertility rate (TFR) Markov chain with kernel-smoothed transition probabilities and leave-one-out cross-validation (LOOCV) for bandwidth selection.

K-HTML Hackathon Jul – Aug 2025
Kyung Hee University, Seoul, South Korea
Tools: R, Python, SQL

- Led the overall project, overseeing algorithm development, system logic, and UI/UX design, with technical guidance from AWS and Snowflake.
- Developed an inflation-adjusted price-forecasting algorithm using approximately 20 years of quarterly agricultural price indices and commodity price statistics, and used its forecasts to design a product recommendation system to identify cost-effective seasonal produce and encourage price competition among local vendors.
- Designed a day-of-week delivery scheduling system to consolidate orders by product category and reduce per-order logistics costs.

SCHOLARSHIPS & AWARDS

University of Seoul Student Development Grant	May 2026
University of Seoul Talent Scholarship	Mar 2026
Scholarship for Excellent Achievement (50% tuition waiver)	Mar 2026
Korea-U.S. Student Exchange Program in High-Tech Industry Scholarship ($18,000)	Dec 2025
Undergraduate Teaching Assistant with Scholarship (Asset Pricing Theory)	Sep 2025
Commendation for Outstanding Social Service Personnel	Sep 2024
University Development Fund Scholarship	Mar 2021

RELEVANT COURSES

Undergraduate Economics: Microeconomics, Advanced Microeconomics, Macroeconomics, Econometrics, Advanced Econometrics, Labor Economics, Industrial Organization, Public Finance, Environmental Economics, Strategy and Information (Game Theory)

Undergraduate Mathematics & Statistics: Linear Algebra I/II, Mathematical Analysis I/II, Probability, Ordinary Differential Equations, Applied Mathematical Statistics, Introduction to Topology, Introduction to Stochastic Process, Numerical Methods with Programming, Statistics Seminar

PhD-Level Courses: Microeconomic Analysis (in progress), Probability I (Measure-Theoretic Probability) (in progress)

TEST SCORES & SKILLS

GRE Quantitative: 168/170
Programming: R, Stata, Python, MATLAB, SQL, LaTeX, GitHub
Languages: Korean (native), English (fluent)

MILITARY SERVICE

Social Service Personnel (Alternative Military Service) Feb 2022 – Nov 2023
